According to the National Mental Health Association (<http://www.nimh.nih.gov/>), a mental health impairment is a disease that causes mild to severe disturbances in thought and/or behavior, resulting in an inability to cope with life's ordinary demands and routines. There are more than 200 classified forms of mental illness. Some of the more common disorders are depression, bipolar disorder, dementia, schizophrenia, post-traumatic stress disorder (PTSD), obsessive-compulsive disorder (OCD), panic disorders, seasonal affective disorder (SAD), and anxiety disorders. Symptoms may include changes in mood, personality, personal habits, and/or social withdrawal. An estimated 54 million Americans suffer from some form of mental disorder in a given year.
